Find information on future webinars listed under Upcoming Events - you'll find the link on the AHFA home page. Registration is easy, and most webinars are free, although some are limited to AHFA members only.

If you've missed a meeting or presentation of interest, archived Power Points and webcasts are listed here on the Education page, where you can search by topic or see all presentations and webinars listed by date originally presented. When it is relevant, AHFA will even post a transcript of Q and A sessions that take place as part of a live webinar.

It's all part of our commitment to keep our member companies informed and one step ahead on the issues that impact day-to-day operations.

Instructions: First, you need to download GotoMeeting CODEC and Windows Media Player. Links to each of these are to the right. On the Upcoming Events page, you'll always find previews of upcoming webcasts, while links to recent offerings are found here. A brief description is shown for each topic offered. Should you choose to view the presentation after reading the summary, just click START HERE to begin the presentation. We add new webcasts regularly, so please check back from time to time to see what's new!

Have a question? For additional information on upcoming or archived educational content, contact Brenda Grubb.
