

# For every unit we build...

# ...we send 4 pounds of trash to the landfill.

**EFEC goal number 1:** Reduce solid waste going to the land fill by 5% - That's about 100,000 pounds per year.

We'll do it by recycling and reducing our waste.

L A  B O Y

# La-Z-Boy's Environmental Initiative

## Our Environmental Policy

- Reduce waste and increase recycling
- Use energy and natural resources efficiently
- Reduce the environmental burden of waste generation and emissions to the air, water and land
- Dispose of waste in a safe and environmentally sound manner
- Continually assess the impact of our manufacturing process on the environment and community
- Employees trained to respond effectively in the case of an environmental emergency
- Foster an open dialog with our employees and the community

L A  B O Y

# Beautiful?

*It depends on your point of view.*

**Meeting EFEC Goals number 3 and 4:** Our new chiller will consume less energy than our old one, and it will release no pollutants.

*We think it's beautiful!  
Thanks La-Z-Boy*

## EFEC Goals

- Reduce solid waste going to the landfill by 5%
- Reduce emissions from the finish room by 2%.
- Reduce emissions from the gas boiler by 15%.
- Reduce natural gas consumption by 15%.
- Enhance the community's awareness of EFEC and of our environmental policies
- Find ways to recycle fabric scrap
- Recycle office paper
- Recycle plastic trash
- Bring a more efficient cooling system on line
- Reduce electricity waste

## Office Paper

- Put white paper in **White Paper** Containers
- Put other paper in **Mixed Paper** Containers
- No dirt or garbage

## Plastic Sheet

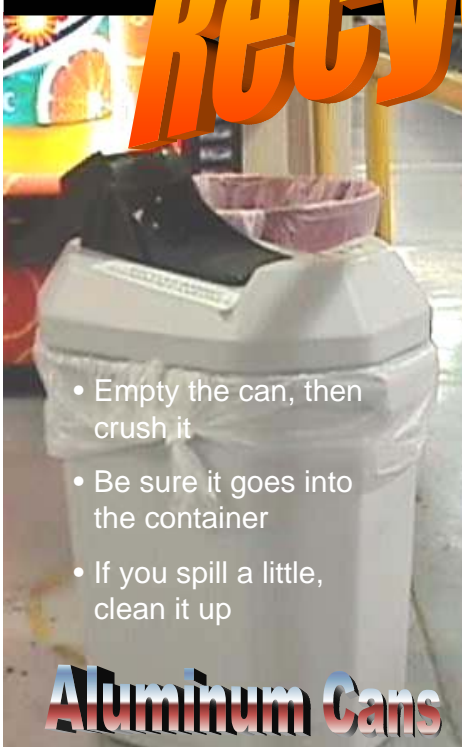

- Stretchable plastic bags and sheeting only
- Remove paper labels
- No dirt or garbage

Turn off  
the lights  
when nobody's  
home

# Recycling

- Empty the can, then crush it
- Be sure it goes into the container
- If you spill a little, clean it up

## Aluminum Cans

- Plastic bottles and lids only
- No trash

## Plastic Bottles

A simple click  
saves valuable  
resources.

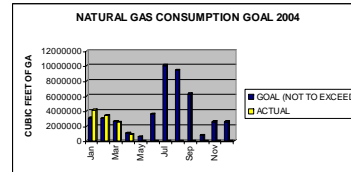

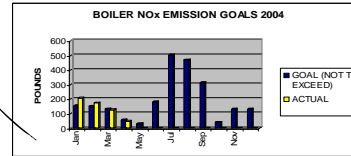

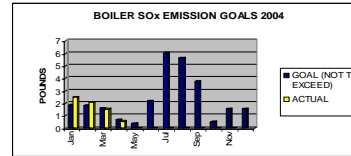

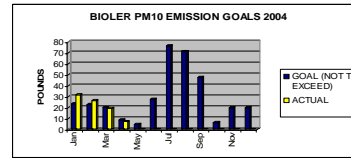

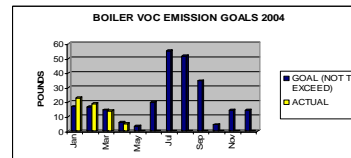

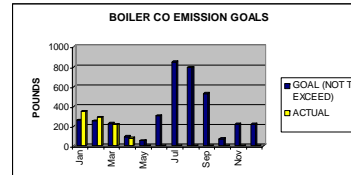

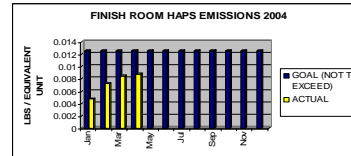

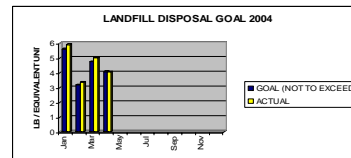

Reducing energy  
consumption is a  
La-Z-Boy  
environmental  
goal

# Environmental Progress!

## La-Z-Boy Utah Environmental Goals:

- Reduce waste going to the land fill by 5%.  
*In April we recycled 8,113 pounds of plastic. This is the equivalent of a 6% reduction for the month. On average, we collect around 450 pounds of plastic per day.*
- Reduce VOC / HAPS emissions (air pollution) from the finish room by 2%.  
*Since the 1st of January, we have met and exceeded this goal.*
- Reduce particulate and VOC emissions from the gas boiler.  
*The installation of the new electric chiller will make it possible to achieve this goal.*
- Reduce natural gas consumption by 15%.  
*The new electric chiller will allow us to meet this goal.*
- Enhance the community's awareness of EFEC and our environmental policies.  
*We have sent an article about our program to the local paper. We hope to see in print this week.*
